PROFILE

I am a front end developer focused on intuitive design and functional simplicity.

EMPLOYMENT HISTORY

Front-End Web Developer, Insured.io
Sacramento

Oct 2019 — Present

- Utilized HTML, CSS, JavaScript, and ColdFusion to create dashboard for insurance quoting
- Redesigned web-based insurance quoting application
- Streamlined complex insurance business rules to user-friendly UI
- Translated insurance logic to code, creating a more efficient quoting process
- Collaborated with insurance experts to meet changing requirements in business logic

Freelancer/Contractor, eStreet Co
Sacramento

Jul 2020 — Aug 2020

- Built custom marketing websites using WordPress platform and technologies including: HTML5, CSS, JavaScript.
- Coordinated with designers to translate Adobe XD designs to code
- Created e-commerce website for a local distillery
- Created marketing website for a Minnesota Congressional Representative

SIDE PROJECTS

Neighborhood Connect v0.1 | Ongoing Development
Code 4 Sacramento

Jul 2019 — Present

- Code for Sacramento project to connect neighborhood leaders to city officials
- Spearheaded the implementation of responsive design and animations from scratch per the UI/UX team's specification to create a minimal viable product for demo showcase at Sacramento City Hall

ORGANIZATIONS

Co-Host | freeCodeCamp

- Guided, solved and debugged web applications for beginner developers

Code for America, Sacramento Brigade

- Collaborated with developers to leverage technology as a tool to connect citizens with community resources and each other.
